

Instructions for Use:

For the full program Terms and Conditions please refer to page 3 of your application.

Step 1: Determine Eligibility:

Verify the utility company listed on the rebate application is your utility service provider. Applications for other participating utility service providers can be found on the www.encyciencyunited.com website by selecting the name of your utility service provider.

Thoroughly read the eligibility requirements in the "Total Rebate Requested" section to verify the items you have installed meet all of the eligibility terms.

Step 2: Install program defined measures:

Some measures may be installed by you, the homeowner. If this is the case, make sure you save the receipts for the measures for which you plan to request a rebate.

It may be necessary to hire a contractor to install some of the measures. You may either select a licensed contractor from your community or visit the "Registered Contractors" link (coming soon) on our website, which includes a list of contractors who have notified us they provide installation services for rebate eligible measures.

Once the work has been completed, make sure you get a paid receipt/invoice from your contractor. Your receipt or invoice must clearly indicate the equipment type, make, model, serial number, price and date of purchase or installation. Also, make sure you ask your contractor for his/her signature on the designated line on the application.

Step 3: Complete and submit your rebate application:

Make sure you fill out the application completely. Fields left blank on your application will delay the processing of your rebate application. To verify you have included all the items required see the checklist on Page 1 of the application.

Thank you for participating in the Efficiency United energy optimization program.
